

The purpose of **Solid Technologies, S.L.** is to offer high quality services of solid form development, development of crystallization processes and development of preclinical formulations that meet the expectations and requirements contractually defined with our clients, as well as the objectives and interests of the Company.

As a fundamental part of this achievement in the objectives, the Management of **Solid Technologies, S.L.**, is committed to the continuous improvement of the effectiveness of the defined Quality Management System.

Likewise, the Management of **Solid Technologies, S.L.** assumes as its own the commitment to comply with the applicable legal and regulatory requirements.

The Quality System implemented will follow strict compliance with the European Standard EN ISO 9001.

The Quality system is structured in interrelated processes focused on the achievement of objectives.

Specific objectives in terms of Quality will be set, and their compliance reviewed through the review meetings of the Quality System that the Management periodically carries out, as priority points training, continuous improvement of the system and customer satisfaction are contemplated.

In order to ensure that this Quality Policy is communicated, understood, applied and kept up to date by all levels of the organization, it is available within the organization to all staff, as well as to customers and other interested parties.
