

The purpose of **Solid Technologies, S.L.** is to offer high quality services for the development of solid forms, development of crystallization processes and development of preclinical formulations that meet the requirements and needs contractually defined with our clients, as well as the objectives and interests of the company.

As a fundamental part of the achievement of these objectives, the Management of **Solid Technologies, S.L.**, is committed to the continuous improvement of the effectiveness of the Quality Management System.

Moreover, the Management of **Solid Technologies, S.L.**, assumes as its own the commitment to comply with the current legal and regulatory requirements and other requirements that apply to our activity.

The Quality System implemented will follow strict compliance with the European Standard EN ISO 9001.

The Quality system is structured in interrelated processes focused on achieving objectives.

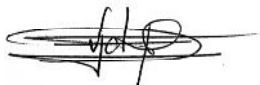

Specific objectives in terms of Quality will be set, and their compliance will be reviewed through the Quality System review meetings that are periodically carried out by the Management; as priority points are Training, Continuous Improvement of the System and Customer Satisfaction.

The management of Solid Technologies, S.L. adopts and implements the Commitment to Good Environmental Practices, based on the following principles:

- Optimization of energy resources.
- Reduction of waste and carbon emissions.

In order to ensure that this *Quality Policy* and *Commitment to Good Environmental Practices* is communicated, understood, applied and kept up to date by all levels of the organization, it is available to all staff, as well as to customers and other interested parties.
